

The Solution That Boosts Loyalty and Your Profits

Switchfly Travel Rewards

Leisure travel is unlike products in typical rewards programs. It's aspirational to the user — their dreams become a reality. It's why more companies are integrating loyalty and travel rewards.

Higher Engagement

- Higher engagement with pre-sale, during the sale, and post-sale with offers, confirmations, and travel suggestions.
- Consumers are spending 65% more on experiences since 2019.

Better Margins

- Online travel programs experience 15–20% margins, and some programs enable markup higher than retail.
- Gift card programs have the lowest margins in the industry.
- Exclusive process with “closed network” rates.

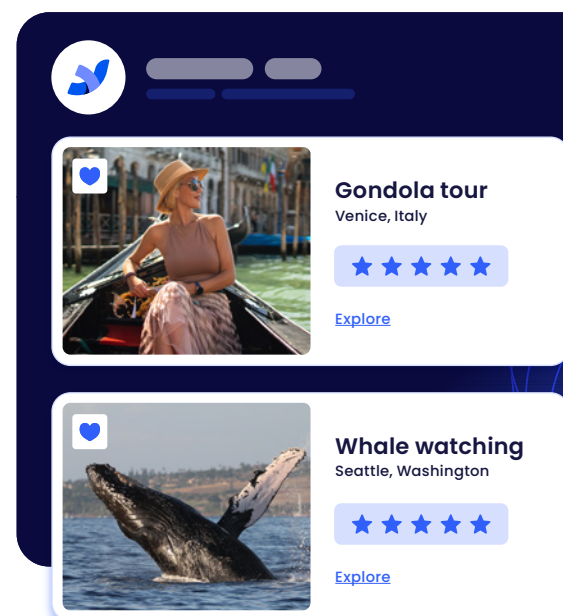

Faster Burn-Down

- Employers can level up employee rewards to employees. For example, employers can provide a \$500 credit for employees to redeem on travel.

The Switchfly difference

Switchfly is the ready-to-deploy solution for a complete online travel platform. And it provides all the infrastructure required to do it right, right away.
